

Greystone

2021
Organic Pinot Noir Rosé

Attractive pale Rosé with aromas of blossom, red berries & mandarin zest on the nose. The palate shows chalky tannins & a lovely tension on the finish. Flavours of red fruits combines with a creamy texture & a crisp saline minerality finishes clean

VITICULTURIST'S NOTES

After a cool beginning to the season the fruit set was naturally small. Ultimately this led to an enticing ripeness to the fruit as the remainder of the growing season was dry and settled. Organically grown with careful hands-on work to encourage the best shoots and bunches to work in

harmony through to harvest. Fruit was harvested in the cool of the morning so it came in cold and could soak some colour out of the skins before pressing and fermentation.

WINEMAKER'S NOTES

2021 was a lovely year for Rose, ripe and concentrated fruit, yet with integrated acidity. The harvest started early again and fruit was picked in small lots at optimal timing. Each picking lot was pressed gently and fermented over four weeks before

balance was deemed perfect. Varieties were fermented separately in tank and French oak barrels before a three month elevage. Vessels were blended together during winter before bottling on-site without fining.
